NORTHBOUND TRAFFIC SHIFT ON THE SPAULDING TURNPIKE PROJECT IN DOVER
LANES SHIFT ON APRIL 6 BETWEEN THE LITTLE BAY BRIDGE AND THE US 4 OVERPASS (EXIT 6)

The New Hampshire Department of Transportation (NHDOT) announces an upcoming traffic shift on the Spaulding Turnpike (NH 16) in Dover to allow for the reconstruction of the Spaulding Turnpike between the Little Bay Bridge and the Dover Toll Plaza.

On the night of Friday, April 6, 2018, northbound Spaulding Turnpike traffic will be shifted onto a new alignment, beginning at the Little Bay Bridge and ending at the Route 4 overpass (Exit 6), where northbound traffic will return back to its current location. This traffic shift will move the two northbound lanes west of their current location, shifting them toward Boston Harbor Road and the NH Division of Motor Vehicles.

Lane closures and short-term rolling roadblocks may be used for this traffic shift. This work will start at approximately 10:00 pm on April 6th and will continue until completed. All night work within the roadway will be completed by 5:00 am. Adverse weather conditions will push the work to the next available day/night.

This work is part of the Spaulding Turnpike improvement project in Newington and Dover. Severino Trucking Company, Inc. of Candia New Hampshire is the prime contractor for the \$67 million project, which is scheduled to be completed in October, 2020.
